Xeriscape IV - Plant Selection

- April 23rd, and May 21st

COST

\$20 PER CLASS, OR
\$60 FOR ALL 4

o *Xeriscape™ I: Concepts and Principles*

This first class of our four part series introduces students to the concept of Xeriscape™ as a landscaping technique. Students will gain a general understanding of all seven principles of Xeriscape™, and how to apply these principles in their landscapes...

o *Xeriscape™ II: Soils, Mulching and Composting*

This may be the single most important aspect of successful landscaping - understanding your soil. This second class of our four part series will look into the technical aspects of soil and soil amending, in addition to reviewing the magic of mulch for water savings and weed control as well as the basics of composting...

o *Xeriscape™ III: Water Management*

Efficient water use may be the best measure of success for any xeriscape. This third class of our four part series investigates water management practices to maximize water use efficiency in your landscape. Participants will learn about proper irrigation scheduling and maintenance, auditing landscapes, utilizing alternative water sources, as well as other practices that can reduce water waste...

o *Xeriscape™ IV: Plant Selection*

This informative final class of our four part series examines plant selection for the many varied habitats found in and around the greater Flagstaff area, including your own yard...
